

Lighting of Roundabouts

Request sent by Michigan DOT on April 11, 2016

Questions: When you build a new roundabout does your policy require to have lighting?
If you do not require lighting do you implement any other mitigation other than signing and pavement markings?

Scenario: Michigan DOT recommends lighting on trunkline roundabouts for which locals are responsible to pay
At a location ready for letting the locals will not agree to pay for the lighting

State	Lighting Mandated/Policy	Comments
Alabama	No	Encourage Lighting
Alaska	No	Consider lighting
